

POWER the Possibilities

The Global Solar Energy line of lightweight, portable solar chargers are both convenient and essential to your outdoor power needs. Whether the goal is a weekend hiking and camping adventure in the Grand Canyon or a 30-day expedition to the top of Mt. Logan, Global Solar's Sunlinq™ and P3 (portable power packs) can travel with you. It's a great way to keep your batteries and electronic devices charged and ready for use.

Global Solar Energy, Inc. manufactures lightweight, high-efficiency photovoltaic materials that have been designed and

engineered into mil-spec grade products. Our Sunlinq™ line of 6.5, 12, and 25 watt products output 12 volts and are as easy to use as plugging your cell phone's auto adapter into your vehicle's 12V socket. Our P3 line of 30 and 62 watt products output 12 to 16 volts and are designed for charging larger battery packs and power-hungry devices such as laptop computers and satellite communication equipment. Take a look inside and call us for more product details.
