Lighting Modes

1. Alternating
2. Chasing
3. Fast Flash
4. Slow Flash
5. Fast Flicker
6. All Lights On

Solar Fairy Lights are perfect for those looking to decorate outside areas without the need for mains wiring. Simply place the lights, position the panel in an area that receives good daylight and away you go.

The solar fairy lights have 6 lighting modes and also a battery saving timer mode which can be set so the fairy lights will turn off after 6, 8 or 10 hours rather than waiting until dawn (typically 14 hours in winter).

Our Solar Fairy Lights are a great way to decorate your home and garden while respecting the environment.

Blue Solar Fairy Lights (white sets either side)
